

Results that have NOT yet been published may be presented following the **procedure [B]**. In general unpublished results may be presented provided an A&R review of the results has been completed successfully AND, an advanced draft of the paper that shall present the result in a refereed journal exists OR it has been decided that the results will only be presented at conferences.

- The A&R review will be managed by the analysis forum group. The A&R review needs to be completed prior to the submission of the abstract (in case the presentation is focused on new results) or prior to completion of a draft presentation (in case the new results only supplement the presentation).

- Unpublished results may be presented in case an advanced draft of a journal publication has been written (to be confirmed by the chair of the publication board (PB)) or in case it has been decided by the executive committee (on recommendation by the corresponding AWG convener and the PB chair) that the results shall be published only in form of conference contributions.

- Advanced drafts of a journal publication must have been circulated within the corresponding AWG. In order to present the results in a conference, the advanced state of the draft must be confirmed by the chair of the AWG and the chair of the PB. The collaboration shall be informed about the draft and the intention to present the results in a publication at least 2 weeks prior to the submission of an abstract.

- Any decision to limit the publication of new results to conferences shall be discussed in the corresponding AWG(s). The collaboration shall be informed at least 2 weeks prior to a recommendation by the corresponding AWG convener and the chair of the PB.

- Once all steps above have been completed, procedures outlines in [A] shall be followed.
